Confidentiality Statement and Other Important Considerations

As of January 2026

Adams Street

Adams Street Partners has provided this presentation (the "Presentation") to the recipient on a confidential and limited basis.

Potential investors should refer to the confidential offering materials, governing documents, subscription agreements, or similar documents (collectively "Final Documentation") before making any final investment decision; the information contained herein should not be used or relied upon in connection with the purchase or sale of any security. Potential investors should take into account all the characteristics or objectives of a relevant Adams Street-managed investment vehicle before deciding to invest. The Final Documentation contains important information regarding risk factors, performance, costs and other material aspects of any proposed investment.

This Presentation is not an offer to sell or a solicitation of an offer to buy any security issued by any Adams Street-sponsored investment vehicle and may not be distributed in any jurisdiction except in accordance with legal requirements applicable in such jurisdiction. Offerings are made only pursuant to the Final Documentation and only where permitted by law.

Any information included herein is preliminary, subject to adjustment as represented in, and qualified in its entirety by, and is replaced by the information in the Final Documentation. Subscriptions to an Adams Street-managed investment vehicle will only be made and accepted on the basis of the Final Documentation.

Statements in the Presentation are made as of the date of the Presentation unless stated otherwise, and there is no implication that the information contained herein is correct as of any time subsequent to such date. All information with respect to primary and secondary investments of Adams Street Partners' funds (the "Funds") or Adams Street Partners' managed accounts (collectively, the "Investments"), the Investments' underlying portfolio companies, Fund portfolio companies, and industry data has been obtained from sources believed to be reliable and current, but accuracy cannot be guaranteed. The source of the information in this Presentation represents a mixture of Adams Street proprietary information and subjective analysis based on deal flow, market observations, historical returns and other factors as well as objective information, the source for which has generally been indicated or is otherwise available.

The Presentation contains highly confidential information. In accepting the Presentation, each recipient agrees that it will (i) not copy, reproduce, or distribute the Presentation, in whole or in part, to any person or party (including any employee of the recipient other than an employee or other representative directly involved in evaluating the Funds) without the prior written consent of Adams Street Partners, (ii) keep permanently confidential all information not already public contained herein, and (iii) use the Presentation solely for the purpose set forth in the first paragraph.

The Presentation is not intended to be relied upon as investment advice as the investment situation of potential investors depends on individual circumstances, which necessarily differ and are subject to change. The contents herein are not to be construed as legal, business, or tax advice, and each investor should consult its own attorney, business advisor, and tax advisor as to legal, business, and tax advice.

The internal rate of return (IRR) data and multiples provided in the Presentation are calculated as indicated in the applicable notes to the Presentation, which notes are an important component of the Presentation and the performance information contained herein. IRR performance data may include unrealized portfolio investments; there can be no assurance that such unrealized investments will ultimately achieve a liquidation event at the value assigned by Adams Street Partners or the General Partner of the relevant Investment, as applicable. Any fund-level net IRRs and net multiples presented herein for the 2015 Global Program Funds and all subsequently formed commingled Funds reflect the use of the Fund's capital call credit line (or, in the case of an Adams Street Global Fund, capital call credit lines of the underlying Funds) and are calculated using limited partner capital call dates, rather than the earlier dates on which the investment was made using the line of credit. The use of such dates generally results in higher net IRR and net multiple calculations, and the related differences in net IRR and net multiple figures could be material. The use of leverage has the potential to increase returns for positive investments, but can also result in substantially increased losses or returns on negative investments.

Any target returns are only targets, are aspirational in nature and based on Adams Street's historical experience as an investor; returns have not been modeled for a particular vehicle using assumptions related to returns of specific investments or other factors. There is no guarantee that targeted returns will be realized or achieved or that an investment strategy will be successful. Investors should keep in mind that the securities markets are volatile and unpredictable. There are no guarantees that the historical performance of an investment, portfolio, or asset class will have a direct correlation with its future performance.

Any gross performance figures displayed herein should be taken in context with applicable net figures which include the effect of management fees, carried interest and expenses which reduce returns to investors. A full description of the costs of participation in an Investment, including such management fees, carried interest and expenses, is available in the relevant Final Documentation and relevant net figures are also included herein, including a detailed description of Adams Street's calculation methodology with respect to performance that represents a composite or extract which can be found on the pages entitled "Methodology and Assumptions Associated with Calculation of Composites and Extracts".

Confidentiality Statement and Other Important Considerations

As of January 2026

Adams Street

Certain information contained in this Presentation constitutes "forward-looking statements" that may be identified by the use of forward-looking terminology such as "may," "will," "should," "expect," "anticipate," "estimate," "intend," "continue," or "believe" or the negatives thereof or other variations thereon or comparable terminology. Any forward-looking statements included herein are based on Adams Street's current opinions, assumptions, expectations, beliefs, intentions, estimates or strategies regarding future events, are subject to risks and uncertainties, and are provided for informational purposes only. Actual and future results and trends could differ materially, positively or negatively, from those described or contemplated in such forward-looking statements. Moreover, actual events are difficult to project and often depend upon factors that are beyond the control of Adams Street. No forward-looking statements contained in this Presentation constitute a guarantee, promise, projection, forecast or prediction of, or representation as to, the future and actual events may differ materially. Adams Street neither (i) assumes responsibility for the accuracy or completeness of any forward-looking statements, nor (ii) undertakes any obligation to update or revise any forward-looking statements for any reason after the date of this Presentation.

Past performance is not a guarantee of future results and there can be no guarantee against a loss, including a complete loss, of capital. Projections or forward-looking statements contained in the Presentation are only estimates of future results or events that are based upon assumptions made at the time such projections or statements were developed or made. There can be no assurance that the results set forth in the projections or the events predicted will be attained, and actual results may be significantly different from the projections. Also, general economic factors, which are not predictable, can have a material impact on the reliability of projections or forward-looking statements. Therefore, the returns an investor ultimately realizes will depend on a variety of factors, including but not limited to how the market performs and the length of investment. ***FOR ADDITIONAL IMPORTANT INFORMATION RELATED TO POTENTIAL RISKS ASSOCIATED WITH AN INVESTMENT, PLEASE SEE THE KEY RISK FACTORS PAGES AT THE END OF THIS PRESENTATION.***

References to the Investments and their underlying portfolio companies and to the Funds should not be considered a recommendation or solicitation for any such Investment, portfolio company, or Fund. Any case studies included in this presentation are for illustrative purposes only and have been selected to provide, among other things, examples of investment strategy and/or deal sourcing. These investments do not represent all the investments that may be selected by Adams Street Partners with respect to a particular asset class or a particular Fund or account.

Neither the U.S. Securities and Exchange Commission nor any U.S. state or non-U.S. securities commission has reviewed or passed upon the accuracy or adequacy of this Presentation or the merits of the offering described herein. Any representation to the contrary is unlawful.

This Presentation may contain material non-public information. The recipient should be aware that U.S. federal and state securities laws may restrict any person with material, non-public information about an issuer from purchasing or selling securities of such issuer or from communicating such information to any other person under circumstances in which it is reasonably foreseeable that such person is likely to purchase or sell such securities in reliance on such information.

Geographic Disclosures:

United States: Adams Street Partners, LLC ("Adams Street") a limited liability company formed in Delaware is an investment adviser registered with the US Securities and Exchange Commission ("SEC") under the Investment Advisers Act of 1940, as amended; however, such registration does not imply a certain level of skill or training. Adams Street is governed by applicable US laws, which differ from laws in other jurisdictions. In some cases, Adams Street has formed subsidiaries which are registered with, and subject to the regulation of, local securities authorities and other government agencies. Additional information is available upon request.

Australia: Adams Street Partners, LLC is exempted from the requirement to hold an Australian financial services license under ASIC Class Order 03/1100 (as extended by ASIC Corporations (Repeal and Transitional) Instrument 2016/396); Australian Registered Body Number 665 655 738.

European Economic Area: Adams Street's activities in the EEA are conducted through its subsidiary, Adams Street (Europe) GmbH, Local court of Munich HRB 228324, which is authorized and regulated by the German Federal Financial Supervisory Authority (BaFin-ID 10148538).

United Kingdom: Adams Street's activities in the UK are conducted through its subsidiary, Adams Street Partners UK LLP, a limited liability partnership registered in England and Wales (Registered No. OC350269), which is authorized and regulated by the Financial Conduct Authority (FCA No. 514886).

Adams Street

Real Deals Private Equity Awards

Award for Adams Street's deep expertise and strategy delivering superior results through disciplined investment in middle-market, private equity secondaries transactions.

Adams Street Partners

Secondaries Investor of the Year

Participant in GP-Led Deal of the Year (Americas)

Adams Street's unique access and strong partnership, supported Accel-KKR's award-winning $2.2 billion raise which received the PEI "GP-Led Deal of the Year Americas"

Accel-KKR

GP-Led Deal of the Year Americas

Real Deals 2025: Award issued April 3, 2025.Awards conducted by Real Deals. Self-nominations are received online for all categories, entrants are initially assessed by the Real Deals editorial team to identify a shortlist for each category which are then shared with a panel of judges comprised of senior representatives from leading LPs and PE firms who base their decisions on several factors, including factors such as exit multiples (for exits), growth (by revenue, headcount and geographical expansion), as well as a firm's ability to respond to challenges. Adams Street did not directly or indirectly provide compensation for inclusion in this ranking. The description and the selection methodologies of rankings and awards can be subjective and will often vary; additional information on the ranking or award methodologies is generally available from the sponsor. These rankings or awards may not represent investor experience with Adams Street or Adams Street's Funds or services, nor do they constitute a recommendation of Adams Street or its services. Such ranking or award is not necessarily indicative of Adams Street's past or future performance.

Private Equity International 2024: Awarded to Accel-KKR. Awarded to Accel-KKR. Accel-KKR has provided Adams Street with permission to reference such award, including the use of the logo. Adams Street was among multiple purchasers of the associated deal, but did not lead the deal, may have had limited input on the structure of the transaction, may have been limited in other ways, and was not involved in the award entry or selection process and therefore Adams Street is unaware of the award criteria. Adams Street did not directly or indirectly provide compensation for inclusion in this ranking, nor are they aware of Accel-KKR doing so. The description and the selection methodologies of rankings and awards can be subjective and will often vary; additional information on the ranking or award methodologies is generally available from the sponsor. These rankings or awards may not represent investor experience with an investment adviser (whether Adams Street or Accel-KKR), and investment adviser's Funds or services, nor do they constitute a recommendation of an investment adviser or its services. Such ranking or award is not necessarily indicative of Adams Street's past or future performance.

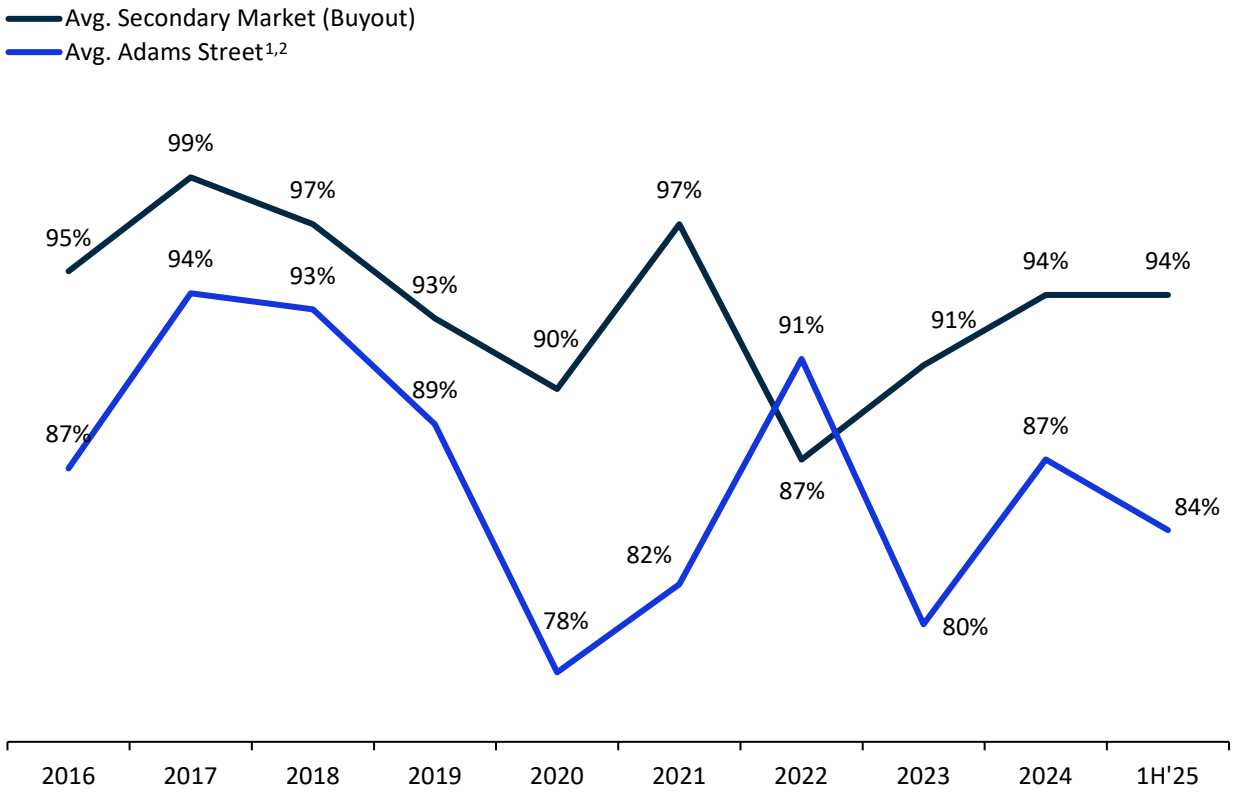
Secondary Pricing Over Time – Accessing Inefficiency and Embedded Value

Adams Street

Secondary Market Pricing vs. Adams Street Since 2016



PRICING HIGHLIGHTS

(7.2%)

Average Spread Between Market and Adams Street[2]

DRIVERS OF INEFFICIENT PRICING[3]

- Less competitive/ restrictive processes
- Less transparent mid-market valuations
- Intimate knowledge of underlying assets

Source: Jefferies – "H1 2025 Global Secondary Market Review".

1. Represents purchase price as a % of total value during the first quarter the transaction is reported. There can be no guarantee that such investments will ultimately be successful or that Adams Street will be able to realize any such discount or other growth with respect to such investment. Further, there can be no guarantee as to the timing or attractiveness of liquidity for any such investment. Past performance is not necessarily indicative of future results and there can be no assurance that any such unrealized investments will ultimately achieve a liquidation event at the value assigned by Adams Street Partners or the General Partner of the relevant Investment, as applicable. Data is as of June 30, 2025.
2. Average spread between market and Adams Street is calculated using a simple (non-capital weighted) average based on the differential between the estimated price of all Adams Street deals completed in each year versus the average estimated pricing for all secondary market deals as reported by Jeffries in the corresponding year. Estimated price percentage is measured as described above in footnote 1.
3. Statements made herein generally represent a mixture of (i) objective data attained through a variety of sources which are available upon request, as well as (ii) Adams Street's analysis and related beliefs, opinions and views based on market observations, historical deal flow, experience and/or other factors; provided, however, that there can be no guarantee that this represents a complete universe of relevant data or opinions. Statements made represent current views and opinions as of June 30, 2025 and are subject to change without any further obligation to update.

For illustrative purposes only. This case study is provided solely to demonstrate Adams Street's process, views and analysis in implementing its investment strategy and is subject to change. It is not intended to predict the performance of any Adams Street investment and there can be no guarantee that other Adams Street investments will display similar characteristics or that similarly attractive investment opportunities will be available. The views, opinions and information presented herein were current as of May 2025 and (unless the context indicates otherwise) are not subject to update. Past performance is not indicative of future results. A complete list of Adams Street's investments is available upon request.

1. "Pods" reflect internal ways of tracking relationship management and diligence efforts and may constitute formal or informal designations and membership on any pod may be fluid. As determined necessary – such as when there is material non-public information, where the best interests of Adams Street investors creates a conflict of interest for Adams Street teams, or for other reasons – certain sensitive information may be compartmentalized by an investment team and not shared within the relevant pod.

Targeted Strategy Seeking Attractive Risk-Adjusted Return

Adams Street

Adams Street Target Deal Attributes[1]		% of GSF6 & GSF7[2]
Existing Small/Mid-Market Adams Street Buyout GPs	Focus on <$5 billion funds where there is greater potential for value appreciation and information asymmetry to drive attractive pricing	~70%
Target Alpha Producing Transactions	Target high-quality assets to deliver consistent returns versus index buying and relying on the macro environment	~90%[3]
<$200 Million Deal Size	Less competitive, undercapitalized secondary mid-market creates attractive dynamics, resulting in better entry prices	~85%

Statements made herein generally represent a mixture of (i) objective data attained through a variety of sources which are available upon request, as well as (ii) Adams Street's analysis and related beliefs, opinions and views based on market observations, historical deal flow, experience and/or other factors; provided, however, that there can be no guarantee that this represents a complete universe of relevant data or opinions. Statements made represent current views and opinions as of June 30, 2025, and are subject to change without any further obligation to update. Past performance is not necessarily indicative of future results and there can be no guarantee against a loss, including a substantial loss of capital

1. Represent Adams Street target attributes and activities associated with our portfolio management process; provided, however, that there can be no guarantee that any portfolio will exhibit all such characteristics or that Adams Street will be successful in engaging in such activities
2. Information calculated on a per deal basis (i.e., non-capital weighted); the percentages indicated here may change, potentially significantly, if calculated on a capital-weighted basis. Past performance is not necessarily indicative of future results.
3. Represents transactions with 3 or fewer managers.

Small/Mid-Market Buyout Presents Unique Value Proposition for Secondaries

Adams Street

SMALL/MID-MARKET FOCUS

~80%

of GSF7 investments are in small/mid-market funds (<$5 billion)

WHY SMALL/MID-MARKET?

- Multiple levers to transform underlying companies and value creation
- Limited secondary buyer knowledge / insights
- Wide dispersion of valuation policies
- Heightened importance of manager quality
- GPs value individual LP relationships the most

Deal Commitment with Existing Adams Street GPs

Past performance is not necessarily indicative of future results. The page entitled **"GSF7 Investment Summary"** included in this presentation contains fund performance information.

1. General Partner responsible for the initial contribution of the deal; Limited Partners to fund 100% of future capital calls until the General Partner / Limited Partner split is proportionate to respective commitments.
2. Represents purchase price as a % of total value during the first quarter the transaction is reported. For deals closed post-6/30/2025, the figure/range provided is based on estimates at deal close. There can be no guarantee that such estimates are accurate, nor can there by any guarantee that such investments will ultimately be successful or that Adams Street will be able to realize any such discount or other growth with respect to such investment. Further, there can be no guarantee as to the timing or attractiveness of liquidity for any such investment. MOIC defined as total value divided by paid-in capital for all allocated transactions. Past performance is not necessarily indicative of future results and there can be no assurance that any such unrealized investments will ultimately achieve a liquidation event at the value assigned by Adams Street Partners or the General Partner of the relevant Investment, as applicable. Data is as of September 30, 2025.
3. Net performance is hypothetical as such performance represents either (i) a composite of investments made across multiple funds and is based on Adams Street Partners models or (ii) performance of extracted investments made within a single fund and does not account for the full performance of the applicable fund. In either case, such calculation of net performance makes certain material assumptions regarding fees and expenses based on the, respectively, (i) fee schedule or (ii) performance of the applicable fund. Based on the methodology for calculating hypothetical net performance, such net values do not incorporate the use of leverage and are calculated over the same period of time as stated gross values. **For a further description of the model as well as relevant assumptions and risk associated with such hypothetical performance, please see the page entitled "Methodology and Assumptions Associated with Calculation of Composites and Extracts" contained at the end of this Presentation."**

Proactive Fund Management Philosophy Optimizes Risk/Return

Adams Street

Since 2016

$6.4bn+
Capital Invested

127
Transactions

$2.9bn
Gains Generated
vs. $57mm of losses[1]

Risk management starts with asset selection

- Strategic focus on high-quality, well-known assets limits downside
- Mid-life, mid-market exposure creates short-term exit optionality

Disciplined approach to allocations driven by duration and diversification goals

- Balance weighted toward LP-Led deals and multi-asset GP-Leds
- Strict limit on single company, GP, sector, etc. exposures

Capital efficiency key goal of funds' cash management approach

- Subscription facility and strategic use of deferred purchase price structures limit upfront capital calls
- Purposeful overcommitment ensures LP commitments are fully put to work in deals and limits gross/net spread

Limited third-party deal leverage maximizes flexibility for proactive liquidity generation at fund level

- Lowly-levered growth companies are a sought-after collateral play for lenders
- Advantageous terms and structures (*e.g.*, cash sweep holiday, low relative spread) available as a result

Data as of June 30, 2025. The above represents a summary only of Adams Street's portfolio construction process; however, additional detail is available upon request and there can be no guarantee against a loss, including substantial loss of capital.

1. Performance data is composite data for the investments made during the specified time period; it does not present returns achieved by any particular Adams Street Partners fund or any investor in an Adams Street Partners fund. For fund-level performance, including net performance, of Adams Street's commingled secondary vehicles, as well as a discussion of PME outperformance (including fund level outperformance), please see the slide entitled "**Notes to Performance: Secondary Investment Performance**" in this presentation.

Adams Street Global Secondary Fund 8

Key Terms and Conditions

Target Fund Size	$2.0 billion
Fund Term	10 Years + 3 one-year extensions
Target Commitment Period	3 - 4 Years
Minimum Subscription	$10 million
Management Fees	**Subscription Amount[1]** / **Management Fee[2,3]** First $25 million / 1.00% Next $25 million / 0.90% Next $50 million / 0.75% Thereafter / 0.50%
Carried Interest	10%
Hurdle	8%

Fund terms are potentially subject to adjustment as represented in, and qualified in their entirety by, the final governing documents of such fund. Potential investors should carefully review the governing documents for more detailed descriptions regarding fees, expenses, strategy, risks and other important information. Targeted net returns (after Adams Street's fees, expenses and carried interest) are only targets, aspirational in nature and based on Adams Street's historical experience as an investor; returns have not been modeled for the fund using assumptions related to returns of specific investments or other factors. There is no guarantee that Adams Street or any investment vehicle advised thereby will achieve returns in the targeted range.

1. All investors will be charged a management fee assessed at a weighted average rate determined by the relevant investor's total subscription amount and corresponding management fee rate(s). The corresponding management fee rate(s) generally decrease as the total subscription amount increases. As a result, investors will generally pay progressively lower fees as the total subscription amount increases.
2. Management Fee refers to the annual fee charged on subscription amount in the first 6 years of the Fund and provided that fees are charged across breakpoints, such that headline rates represent the nominal management fee for amounts within each band. For example, a $100 million subscription would have a weighted average headline fee of 0.85%
3. Fees tail down to 90% of the regular fee on the 6th anniversary of the first day of the calendar quarter in which the strategy made its first investment ("Fee Commencement Date"), 80% on the 7th anniversary of the Fee Commencement Date, 70% on the 8th anniversary of the Fee Commencement Date, and so on going forward.

Global Secondary Fund 7 Case Studies

Adams Street

PROJECT NOHO

GSF7: $16 Million
Q3 2021
Growth / Small-Mid Buyout
GP-led

Deal Overview:
Multi-asset continuation vehicle in an Adams Street GP

Investment Thesis:
- Strong alignment with a well-regarded Adams Street GP
- Strong underlying asset performance
- Attractive cash flow profile, valuations, and upside potential

Adams Street Advantage:
- Oversubscribed transaction accessed via strong relationship as a Primary LP
- In-depth asset knowledge given involvement in prior iteration of deal

Unlevered, Gross / Net TVPI[1]:	Unlevered, Gross / Net IRR[1]:
1.9x / 1.8x	33% / 27%

PROJECT CHARGE

GSF7: $65 Million
Q4 2022 / Q1 2023
Buyout
Portfolio

Deal Overview:
Portfolio of attractive buyout exposure managed by 5 Adams Street GPs

Investment Thesis:
- Highly diversified portfolio with a balanced duration profile
- Significant Adams Street overlap with existing relationships across all GPs
- Attractive entry point driven by compelling discount

Adams Street Advantage:
- Highly restrictive process
- Ability to provide a meaningful solution for the seller across numerous funds

Unlevered, Gross / Net TVPI[1]:	Unlevered, Gross / Net IRR[1]:
1.4x / 1.3x	19% / 15%

PROJECT POST

GSF7: $48 Million
Q1 2023
Buyout
Portfolio

Deal Overview:
Portfolio of attractive buyout exposure managed by 2 Adams Street managers

Investment Thesis:
- High-confidence, Adams Street GPs
- Well-diversified, performing portfolio
- Balanced duration profile

Adams Street Advantage:
- Longstanding GP relationships
- Highly restrictive process
- Intimate GP dialogue driving portfolio knowledge

Unlevered, Gross / Net TVPI[1]:	Unlevered, Gross / Net IRR[1]:
1.3x / 1.2x	16% / 13%

Appendix

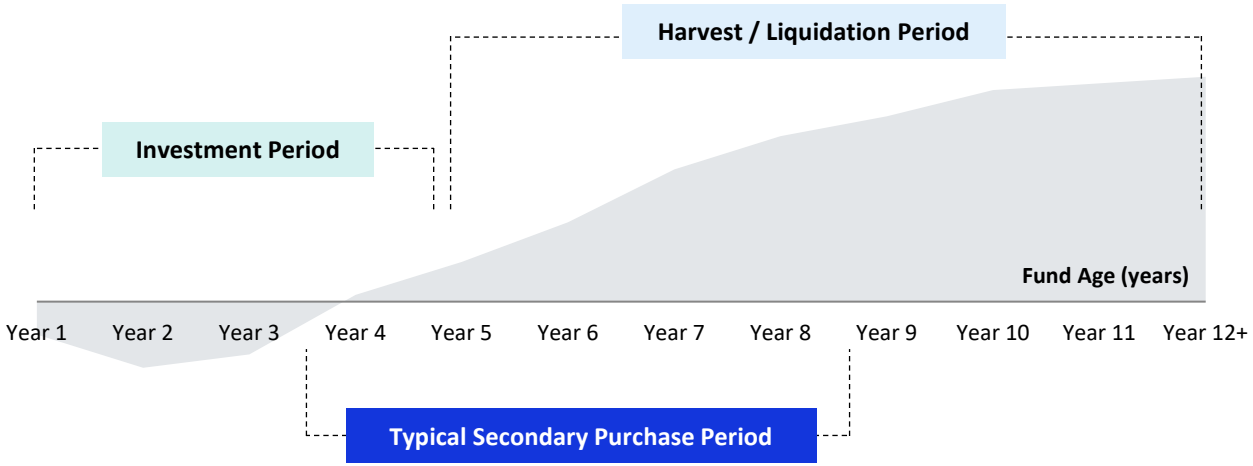
Secondaries Can Offer Unique Benefits to Investors

Adams Street

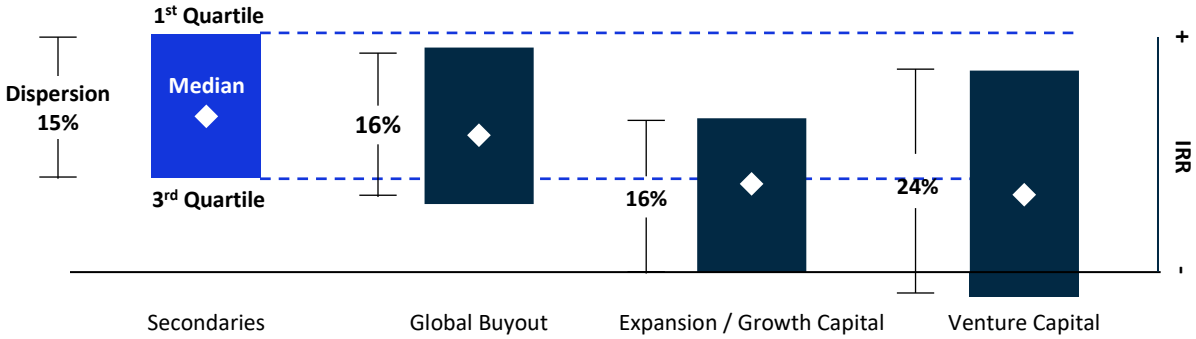
BENEFITS OF SECONDARIES[1]

- Discount / immediate gains
- Earlier liquidity
- Diversification
- Mature assets with increased predictability
- Attractive absolute and risk-adjusted returns

Illustrative Fund Cumulative Cash Flows[2]



Secondaries Have Offered Premium Return Potential With Lower Dispersion of Outcomes[3]



1. The views, opinions, and information herein are based on historical deal flow and market research, were current as of the date of this presentation and are subject to change. The views and opinions expressed herein are with respect to historical conditions in the secondary market generally and do not reflect particular aspects of the Adams Street program. Discounts and "immediate gains" represent estimates and there can be no guarantee that such investments will ultimately be successful. There can be no guarantee as to the timing or attractiveness of liquidity events. Although secondary investments have historically exhibited higher predictability and attractive returns as compared to other private markets investments, past performance is not necessarily indicative of future results and there can be no guarantee against a loss, including a substantial loss of capital.
2. Cash flows depicted are for illustrative purposes only and do not reflect actual cash flows of Adams Street Partners secondary investments. Past performance is not a guarantee of future results.
3. Based on Burgiss data as of December 31, 2023. Numbers are subject to updates by Burgiss. Burgiss is a recognized source of private equity data, and the Burgiss Manager Universe includes funds representing the full range of private capital strategies; however, it may not include all private equity funds and may include some funds which have investment focuses that Adams Street Partners does not invest in. Data and calculations by Burgiss, sourced on October 24, 2024. The returns presented herein do not represent the return of Adams Street or any particular Adams Street Partners fund or investor.

** Investments Outside Dedicated Funds performance shown as of June 30, 2025.

Note: Past performance is not a guarantee of future results. There can be no guarantee that unrealized investments will ultimately be liquidated at the values reflected in this return data.

The page entitled "Notes to Performance: Secondary Investment Performance," included in the presentation, contains the footnotes and is an important component of this performance data.

† Net performance is hypothetical as such performance represents either (i) a composite of investments made across multiple funds and is based on Adams Street Partners models or (ii) performance of extracted investments made within a single fund and does not account for the full performance of the applicable fund. In either case, such calculation of net performance makes certain material assumptions regarding fees and expenses based on the, respectively, (i) fee schedule or (ii) performance of the applicable fund. Based on the methodology for calculating hypothetical net performance, such net values do not incorporate the use of leverage and are calculated over the same period of time as stated gross values. **For a further description of the model as well as relevant assumptions and risks associated with such hypothetical performance, please see the page entitled "Methodology and Assumptions Associated with Calculation of Composites and Extracts" contained at the end of this Presentation."**

Source: A full list of investments is available upon request. Net performance is hypothetical as such performance represents either (i) a composite of investments made across multiple funds and is based on Adams Street Partners models or (ii) performance of extracted investments made within a single fund and does not account for the full performance of the applicable fund. In either case, such calculation of net performance makes certain material assumptions regarding fees and expenses based on the, respectively, (i) fee schedule or (ii) performance of the applicable fund. Based on the methodology for calculating hypothetical net performance, such net values do not incorporate the use of leverage and are calculated over the same period of time as stated gross values. **For a further description of the model as well as relevant assumptions and risks associated with such hypothetical performance, please see the page entitled "Methodology and Assumptions Associated with Calculation of Composites and Extracts" contained at the end of this Presentation.**"

1. Commitment represents purchase price at close plus unfunded commitment remaining at close of each investment; figures shown here are in millions of USD and include only that portion allocated to Adams Street Global Secondary Fund 8, L.P. ("GSF 8").
2. TVPI, often referred to as "multiple," means the ratio of the total value of the investment (distributions to investors plus current net asset value) to the paid-in capital (the amount investors have contributed to the fund). DPI means the ratio of distributions to paid-in capital, or the amount a partnership has distributed to its investors relative to the total capital contribution to the fund. IRR means the internal rate of return. Performance represents each secondary investment's since inception return after the transaction closed as of June 30, 2025. Unlevered gross returns reflect the deduction of any fees, expenses and carried interest charged to the underlying private equity funds or portfolio company investments but are gross of Adams Street Partners' fees, expenses and carried interest, which reduce returns to investors. For net performance of Adams Street Partners funds and secondary portions of other portfolios, **see "Secondary Investment Performance",** included in this presentation. Past performance is not a guarantee of future results. There can be no guarantee that unrealized investments included in this data will ultimately be liquidated at values reflected herein. "NM" is used where the performance metric is not meaningful (i.e., in the case of IRRs of deals that are less than one year old as of the date of performance data indicated herein or in other cases in which there is insufficient data to calculate performance). N/A is indicated for deals that had no performance as of the date of performance data indicated herein. These returns are based upon Adams Street secondary transactions and the terms of those transactions; they do not show performance of the underlying funds.
3. Total net performance does not reflect composite performance of investments listed above, but instead reflects the fund level net performance which includes the effect of leverage. Additional information on all fund level performance in secondary vehicles, including calculation considerations, is available on the page titled **"Secondary Investment Performance"** included in this presentation.

Small / Mid Buyout

Source: A full list of investments is available upon request. Net performance is hypothetical as such performance represents either (i) a composite of investments made across multiple funds and is based on Adams Street Partners models or (ii) performance of extracted investments made within a single fund and does not account for the full performance of the applicable fund. In either case, such calculation of net performance makes certain material assumptions regarding fees and expenses based on the, respectively, (i) fee schedule or (ii) performance of the applicable fund. Based on the methodology for calculating hypothetical net performance, such net values do not incorporate the use of leverage and are calculated over the same period of time as stated gross values. **For a further description of the model as well as relevant assumptions and risks associated with such hypothetical performance, please see the page entitled "Methodology and Assumptions Associated with Calculation of Composites and Extracts" contained at the end of this Presentation.**"

1. Commitment represents purchase price at close plus unfunded commitment remaining at close of each investment; figures shown here are in millions of USD and include only that portion allocated to Adams Street Global Secondary Fund 6, L.P. ("GSF 6").
2. TVPI, often referred to as "multiple," means the ratio of the total value of the investment (distributions to investors plus current net asset value) to the paid-in capital (the amount investors have contributed to the fund). DPI means the ratio of distributions to paid-in capital, or the amount a partnership has distributed to its investors relative to the total capital contribution to the fund. IRR means the internal rate of return. Performance represents each secondary investment's since inception return after the transaction closed as of June 30, 2025. Unlevered gross returns reflect the deduction of any fees, expenses and carried interest charged to the underlying private equity funds or portfolio company investments but are gross of Adams Street Partners' fees, expenses and carried interest, which reduce returns to investors. For net performance of Adams Street Partners funds and secondary portions of other portfolios, **see "Secondary Investment Performance",** included in this presentation. Past performance is not a guarantee of future results. There can be no guarantee that unrealized investments included in this data will ultimately be liquidated at values reflected herein. "NM" is used where the performance metric is not meaningful (i.e., in the case of IRRs of deals that are less than one year old as of the date of performance data indicated herein or in other cases in which there is insufficient data to calculate performance). N/A is indicated for deals that had no performance as of the date of performance data indicated herein. These returns are based upon Adams Street secondary transactions and the terms of those transactions; they do not show performance of the underlying funds.
3. Total net performance does not reflect composite performance of investments listed above, but instead reflects the fund level net performance which includes the effect of leverage. Additional information on all fund level performance in secondary vehicles, including calculation considerations, is available on the page titled **"Secondary Investment Performance"** included in this presentation.

Notes to Performance: Secondary Investment Performance

Adams Street

As of June 30, 2025

1. For the Dedicated Secondary Funds, the fund size is the total capital committed to the funds. Global Secondary Fund 8 final fund size has not yet been finalized. For Secondary Investments Outside Dedicated Secondary Funds, the fund size is the amount of capital committed to secondary investments by other funds and separate accounts as described in footnote 8 from 1986 through present.
2. Vintage year represents the year the first commitment was made by the fund.
3. Net multiples are calculated as the total value (market value plus distributions) divided by the dollars drawn. For the Dedicated Secondary Funds, multiples are net to LPs and reflect deduction of underlying general partners' and Adams Street Partners' fees, carried interest and expenses.
4. For the Dedicated Secondary Funds, net internal rate of return ("IRR") represents annualized internal rate of return to limited partners, since inception, after subtracting underlying general partners' and Adams Street Partners' management fees, carried interest and expenses where applicable.
5. Public Market Equivalent (PME) is calculated using MSCI All Country World Index. PME is calculated by replicating the actual cash flows from the private equity investment in a hypothetical tracking position in the public market index. Shares of the tracking position are purchased (sold) in transaction amounts corresponding to the amount of capital calls (distributions) of the private equity investment. PME is the IRR of the investment in the tracking position. During some periods in which Adams Street Partners investments outperformed the benchmark by a substantial margin, PME could not be calculated because the tracking position in the underlying benchmark index would have resulted in a short position. In these cases (indicated with the symbol *), the PME is calculated using the "Direct Alpha" PME methodology (Gredil, Griffiths, Stucke, "Benchmarking Private Equity: The Direct Alpha Method," 2014). Mathematically, Direct Alpha PME is equal to the IRR of the future value of the cash flows underlying the IRR calculation, where future value is based on the return of the benchmark index, less the IRR of the actual value of the cash flows. PME +/- represents the delta between the gross IRR and its associated gross PME metric (MSCI ACWI).
6. Each of these funds (collectively, the "Dedicated Secondary Funds") is primarily invested in secondary interests. The Adams Street Global Opportunities Secondary Fund and the Adams Street Global Opportunities Secondary Fund II have special investment mandates pursuant to which they participated in investments only after the eligible Global Program funds (and any eligible separate account clients) received investment allocations in accordance with Adams Street Partners' allocation policy.
7. This data reflects all secondary investments (including interests purchased pursuant to a right of first refusal) made by funds other than Dedicated Secondary Funds and separate accounts of which Adams Street Partners (or its predecessor, The Private Equity Group of Brinson Partners, Inc.) is/was the general partner or investment manager. Includes separate accounts no longer with Adams Street Partners. Composite performance of these investments does not reflect performance of any particular Adams Street Partners or Brinson fund or the performance achieved by an investor in an Adams Street Partners or Brinson fund.
8. The Net Multiple and Net IRR reflect the effect of the demand line of credit used by Global Secondary Fund 6, Global Secondary Fund 7, and Global Secondary Fund 8. These multiples do not remove the estimated impact of borrowing. The Net Multiple represents a GSF6, GSF7, and GSF8 investor's total value (market value plus distributions) divided by the dollars drawn, and is net of Adams Street fees, carried interest and expenses. The Net IRR represents a GSF6, GSF7, and GSF8 investor's annualized internal rate of return, and is net of Adams Street fees, carried interest and expenses. Net IRRs and Net Multiples are calculated using limited partner capital call dates, rather than the earlier dates on which the investment was made using the line of credit. The use of such dates generally results in higher net IRR and net multiple calculations, and the related differences in net IRR and net multiple figures could be material. Net Multiples and Net IRRs were calculated by aggregating all GSF6, GSF7, and GSF8 investors; because GSF6, GSF7, and GSF8 investors pay varying levels of fees, any given GSF6, GSF7, and GSF8 investor may have net multiples or IRRs that are lower than or higher than the aggregate net multiples or IRRs presented here. Key terms for GSF8 include 10% carried interest, a 8% hurdle, and annual management fees charged on subscription amounts based on the following subscription ranges – first $25 million (100bps), next $25 million up to $50 million (90bps), next $50 million up to $100 million (75bps), thereafter $100 million (50bps). These amounts are charged in the first 6 years of the Fund. Fees tail down to 90% of the regular fee on the 6th anniversary of the first day of the calendar quarter in which the strategy made its first investment ("Fee Commencement Date"), 80% on the 7th anniversary of the Fee Commencement Date, 70% on the 8th anniversary of the Fee Commencement Date, and so on going forward.

Notes to Performance:
Long Track Record of Strong Secondary Investment Performance

Adams Street

As of June 30, 2025

1. Realized track record includes all secondary transactions since inception whereby realized value is greater than 95% of the total value of the investment.
2. Net performance is hypothetical as such performance represents either (i) a composite of investments made across multiple funds and is based on Adams Street Partners models or (ii) performance of extracted investments made within a single fund and does not account for the full performance of the applicable fund. In either case, such calculation of net performance makes certain material assumptions regarding fees and expenses based on the, respectively, (i) fee schedule or (ii) performance of the applicable fund. Based on the methodology for calculating hypothetical net performance, such net values do not incorporate the use of leverage and are calculated over the same period of time as stated gross values. **For a further description of the model as well as relevant assumptions and risks associated with such hypothetical performance, please see the page entitled "Methodology and Assumptions Associated with Calculation of Composites and Extracts" contained at the end of this Presentation.**
3. Multiple is defined as the ratio of the total value of the investment (distributions to investors plus current net asset value) to the paid-in capital (collectively "TVPI"). Gross deal multiples are calculated net of underlying general partners' fees, carried interest and expenses, but are gross of Adams Street Partners' fees, carried interest and expenses, which reduce returns to investors. Net deal multiples (at both the underlying general partner and Adams Street level) are hypothetical and are calculated in accordance with the methodology described above in FN2. **For net performance of Adams Street Partners' secondary funds and secondary portions of other portfolios, please see the "Secondary Investment Performance" slide included in this presentation.**
4. Capital-weighted annualized returns from inception through quarter end. Gross IRRs (as well as TVPIs) are net of fees, carried interest and expenses charged to the underlying private equity funds, but are gross of Adams Street Partners' fees, carried interest and expenses, which reduce returns to investors. Net IRR (at both the underlying general partner and Adams Street level) are hypothetical and are calculated in accordance with the methodology described above in FN2. **For net performance of Adams Street Partners' secondary funds and secondary portions of other portfolios, please see the "Secondary Investment Performance" slide included in this presentation**. There can be no guarantee that unrealized investments will ultimately be liquidated at the values reflected in this return data.
5. Indices included herein are widely-used reference points within the investment industry but are not necessarily intended to be representative of, or directly comparable to, any Adams Street Partners fund. Such indices may differ from Adams Street Partners funds in terms of composition, risks, strategy, liquidity, or other factors. Based on Burgiss data as of June 30, 2025. The Burgiss data presented here includes a set of Global funds which are invested on a secondary basis. Numbers are subject to updates by Burgiss. Burgiss is a recognized source of private equity data, and the Burgiss Manager Universe includes funds representing the full range of private capital strategies; however, it may not include all private equity funds and may include some funds which have investment focuses that Adams Street Partners does not invest in. Data and calculations by Burgiss, sourced on June 30, 2025. Adams Street has a relationship with the relevant ranking sponsor as a data provider but did not directly or indirectly provide compensation for inclusion in this ranking. Selection methodologies of rankings will often vary and the ranking may not represent investor experience with Adams Street or Adams Street's funds or services, nor does it constitute a recommendation of Adams Street or its services. Such ranking is not necessarily indicative of Adams Street's past or future performance.

Past performance is not a guarantee of future results.

* Composite performance of secondary investments in USD (including interests purchased pursuant to a right of first refusal); it includes all secondary investments from 1986 through current period in all funds or other portfolios over which Adams Street Partners exercises investment discretion (including separate accounts no longer with Adams Street Partners), with the exception of transactions that would not fit the investment criteria for Global Secondary Fund 8. This chart does not present performance achieved by any particular Adams Street Partners fund or any investor in an Adams Street Partners fund. For net returns (which show the effect of Adams Street Partners fees, carried interest and expenses on Adams Street Partners fund returns to investors) of Adams Street Partners funds that invest primarily in secondary private equity interest ("Secondary Funds") and net returns to investors from secondary investments made by Adams Street Partners in other funds and separate accounts (together with Secondary Funds, "Secondary Portfolios"), please see the "Secondary Investment Performance" chart in this presentation. Performance early in the life of a secondary investment may not be indicative of future performance due to a pricing premium or discount.

Notes to Performance:
Global Secondary Fund 6 Portfolio Construction and Performance

Adams Street

As of June 30, 2025

1. TVPI defined as total value divided by paid-in capital for all allocated transactions. Past performance is not necessarily indicative of future results and there can be no assurance that any such unrealized investments will ultimately achieve a liquidation event at the value assigned by Adams Street Partners or the General Partner of the relevant Investment, as applicable. Data is as of June 30, 2025.
2. Represents purchase price as a % of total value during the first quarter the transaction is reported. There can be no guarantee that such estimates are accurate, nor can there by any guarantee that such investments will ultimately be successful or that Adams Street will be able to realize any such discount or other growth with respect to such investment. Further, there can be no guarantee as to the timing or attractiveness of liquidity for any such investment. MOIC defined as total value divided by paid-in capital for all allocated transactions. Past performance is not necessarily indicative of future results and there can be no assurance that any such unrealized investments will ultimately achieve a liquidation event at the value assigned by Adams Street Partners or the General Partner of the relevant Investment, as applicable. Data is as of June 30, 2025.
3. For illustrative purposes only. Logos of general partners represent managers in which Adams Street Global Secondary Fund 6 has made an investment, but do not represent a complete list of investments made by the relevant fund. A complete list of Adams Street investments is available upon request.

Notes to Performance:
Global Secondary Fund 8 Portfolio Construction and Performance

Adams Street

As of June 30, 2025

1. Includes pending closed deals. There can be no guarantee that any pending closed deals will ultimately close or that Adams Street Partners will be able to invest at its currently assumed amounts. Data presented on deal-by-deal basis, in which categorization is assigned based on the majority of commitments in an underlying deal.
2. Represents purchase price as a % of total value during the first quarter the transaction is reported. For deals closed post-6/30/2025, the figure/range provided is based on estimates at deal close. There can be no guarantee that such estimates are accurate, nor can there by any guarantee that such investments will ultimately be successful or that Adams Street will be able to realize any such discount or other growth with respect to such investment. Further, there can be no guarantee as to the timing or attractiveness of liquidity for any such investment. MOIC defined as total value divided by paid-in capital for all allocated transactions. Past performance is not necessarily indicative of future results and there can be no assurance that any such unrealized investments will ultimately achieve a liquidation event at the value assigned by Adams Street Partners or the General Partner of the relevant Investment, as applicable. Data is as of June 30, 2025.
3. TVPI defined as total value divided by paid-in capital for all allocated transactions. Past performance is not necessarily indicative of future results and there can be no assurance that any such unrealized investments will ultimately achieve a liquidation event at the value assigned by Adams Street Partners or the General Partner of the relevant Investment, as applicable. Data is as of June 30, 2025.
4. For illustrative purposes only. Logos of general partners represent managers in which Adams Street Global Secondary Fund 8 has made an investment, but do not represent a complete list of investments made by the relevant fund. A complete list of Adams Street investments is available upon request.

*Indices included herein are widely-used reference points within the investment industry but are not necessarily intended to be representative of, or directly comparable to, any Adams Street Partners fund. Such indices may differ from Adams Street Partners funds in terms of composition, risks, strategy, liquidity, or other factors. Based on Burgiss data as of June 30, 2025. The Burgiss data presented here includes a set of Global funds which are invested on a secondary basis. Numbers are subject to updates by Burgiss. Burgiss is a recognized source of private equity data, and the Burgiss Manager Universe includes funds representing the full range of private capital strategies; however, it may not include all private equity funds and may include some funds which have investment focuses that Adams Street Partners does not invest in. Data and calculations by Burgiss, sourced on June 30, 2025. Adams Street has a relationship with the relevant ranking sponsor as a data provider but did not directly or indirectly provide compensation for inclusion in this ranking. Selection methodologies of rankings will often vary and the ranking may not represent investor experience with Adams Street or Adams Street's funds or services, nor does it constitute a recommendation of Adams Street or its services. Such ranking is not necessarily indicative of Adams Street's past or future performance.

Key Risk Factors

Adams Street

This document identifies a number of benefits associated with, or inherent in, Adams Street's services and operations on behalf of a particular investment strategy or a fund; however, it is important to note that all investments come with material risks, some of which may be magnified in a private markets investment, which may pursue highly speculative investments and which have limited liquidity, as further identified in the Fund's definitive documents. Further, although Adams Street believes that the firm and its personnel will have competitive advantages in identifying, diligencing, monitoring, consulting, improving and ultimately selling investments on behalf of vehicles managed by the firm, there can be no guarantee that Adams Street will be able to maintain such advantages over time, outperform third parties or the financial markets generally, or avoid losses.

THE RISK FACTORS LISTED BELOW ARE GENERAL RISK FACTORS ASSOCIATED WITH INVESTMENT VEHICLES MANAGED BY ADAMS STREET; HOWEVER, THIS LIST IS NOT INTENDED TO BE EXHAUSTIVE. THE EXACT NATURE OF A RISK MAY DIFFER BASED ON THE SPECIFIC NATURE OF THE FUND, INVESTMENT STRATEGY, TARGET GEOGRAPHY, TARGET INVESTMENT CHARACTERISTICS, TYPE(S) OF INVESTMENTS MADE, ETC. AND FURTHER DIFFERENCES IN RISK FACTORS MAY APPEAR BETWEEN DIFFERENT VINTAGE YEARS OF SIMILAR FUNDS, AS A RESULT OF DIFFERENT FUND COUNSEL OR FOR OTHER REASONS. ADDITIONAL IMPORTANT RISKS ASSOCIATED WITH AN INVESTMENT IN A FUND ARE INCLUDED IN—AND INVESTORS SHOULD CAREFULY REVIEW—THE RELEVANT FUND'S FINAL DOCUMENTATION.

Past Performance Not Necessarily Predictive of Future Performance: There is no assurance that the performance of any Adams Street-managed fund will equal or exceed the past investment performance of entities managed by Adams Street or its affiliates.

Appropriateness of Investments: An investment in an Adams Street-managed fund is not appropriate for all investors. An investment is appropriate only for sophisticated investors and an investor must have the financial ability to understand and willingness to accept the extent of its exposure to the risks and lack of liquidity inherent in an investment in an Adams Street-managed fund. Investors should consult their professional advisors to assist them in making their own legal, tax, accounting and financial evaluation of the merits and risks of investment in a fund in light of their own circumstances and financial condition. An investment in an Adams Street-managed fund requires a long-term commitment, with no certainty of return. There may be little or no near-term cash flow available to the limited partners. Many of a fund's portfolio investments will be highly illiquid. Consequently, dispositions of such portfolio investments may require a lengthy time period or may result in distributions in kind to the limited partners.

High Risk Asset Class: Private markets investments, whether made directly into portfolio companies or indirectly via investment funds or CLOs, are high-risk and subject to loss, even loss of a part or all of an investor's entire investment.

Illiquidity: An investment will be highly illiquid. There will be no market for interests, in an Adams Street-managed fund, investors will have only very limited withdrawal rights for specific legal or regulatory reasons, and any transfer of an interest in an Adams Street-managed fund, will be subject to the approval of the general partner of the relevant entity. The interests in an Adams Street-managed fund, will not be registered under the US Securities Act of 1933, as amended (the "Securities Act"), or any state or other securities laws and may not be transferred unless registered under applicable federal or state securities laws or unless an exemption from such laws is available. In addition, the direct or indirect portfolio company investments that a fund will make are also generally and similarly illiquid.

Valuations May Fluctuate: The valuations of investments are calculated based upon good faith assessment of the fair value of the assets. Therefore, valuations of investments for which market quotations are not readily available may differ materially from the values that would have resulted if a liquid market for such investments had existed. Even if market quotations are available such quotations will not always reflect the ultimate realizable value of such investments. Where an Adams Street-managed fund makes investments in underlying funds, Adams Street will review the fund valuations provided by the respective managers of such underlying funds; however, Adams Street will not be able to verify, and will not guarantee in any way, the accuracy of such valuations. A fund may experience fluctuations in results from period to period due to a number of factors, including changes in the values of the investments made pursuant to a fund's strategy, changes in the frequency and amount of drawdowns on capital commitments, distributions, dividends or interest paid in respect of investments, the degree of competition, the timing of the recognition of realized and unrealized gains or losses and general economic and market conditions (including, but not limited to, the effect of any catastrophic and other force majeure events on the financial markets, the economy overall and/or various industries). As an asset class, private markets have exhibited volatility in returns over different periods and it is likely that this will continue to be the case in the future. Such variability may cause results for a particular period not to be indicative of performance in a future period.

Key Risk Factors (continued)

Adams Street

Extraordinary Events: Terrorist activities, anti-terrorist efforts, armed conflicts involving the United States, its interests abroad or other countries and natural disasters may adversely affect the United States, other countries, global financial markets and global economies and could prevent a fund from meeting its investment objectives and other obligations. The potential for future terrorist attacks, the national and international response to terrorist attacks, acts of war or hostility and natural disasters have created many economic and political uncertainties in the past and may do so in the future, which may adversely affect certain financial markets and any Adams Street-managed fund(s) for the short or long term in ways that cannot presently be predicted.

Force Majeure Events: Investments may be subject to catastrophic events and other force majeure events. These events could include fires, floods, earthquakes, adverse weather conditions, pandemics, assertion of eminent domain, strikes, acts of war (declared or undeclared), riots, terrorist acts, "acts of God" and similar risks. These events could result in the partial or total loss of an investment or significant down time resulting in lost revenues, among other potentially detrimental effects. Some force majeure risks are generally uninsurable and, in some cases, investment project agreements can be terminated if the force majeure event is so catastrophic that it cannot be remedied within a reasonable time period.

Impact of Borrowings: Borrowing will directly impact (positively or negatively) the returns of an investment in an Adams Street-managed fund and increase the risks associated with an investment in such fund. Calculations of net and gross IRRs in respect of investment and performance data included and/or referred to in performance materials, and with respect to an Adams Street-managed fund, as reported to limited partners from time to time, are based on the payment date of capital contributions received from the applicable limited partner or timing of investment inflows and outflows received or made by the investing entity. In instances where an Adams Street-managed fund utilizes borrowings under a fund's subscription-based credit facility or asset-backed facility (or other facility), use of such facility (or other leverage) may result in a higher reported IRR (on an investment level and/or fund level) than if the facility had not been utilized because such borrowings were used in lieu of capital contributions or in advance of related capital contributions that would only be made at a later date. Use of a subscription-based credit facility (or other long-term leverage) may present conflicts of interest as a result of certain factors and the applicable fund's general partner may make distributions prior to the repayment of outstanding borrowings.

A credit agreement or borrowing facility frequently will contain other terms that restrict the activities of an Adams Street-managed fund and its limited partners or impose additional obligations on them. For example, certain lenders or facilities are expected to impose restrictions on the applicable fund's general partner's ability to consent to the transfer of a limited partner's interest in such fund or impose concentration or other limits on such fund's investments, and/or financial or other covenants, that could affect the implementation of such fund's investment strategy.

As a result of the foregoing and similar factors, use of such leverage arrangements with respect to investments may provide the applicable fund's general partner with an incentive to fund investments through long-term borrowings in lieu of capital contributions. Moreover, the costs and expenses of any such borrowings will generally be borne as costs and expenses of such fund, which will increase the expenses borne by the applicable limited partners and would be expected to diminish net cash on cash returns.

Subject to the limitations set forth in the applicable partnership agreements, Adams Street maintains substantial flexibility in choosing when and how subscription-based credit facilities or other lending facilities are used. Adams Street is authorized to adopt from time to time policies or guidelines relating to the use of such credit facilities. Such policies may include using the credit facilities to systematically defer calling capital from investors (such as seeking to call capital only once a year). In addition to using such facilities to defer or in lieu of capital calls, Adams Street is authorized to elect to use short or long-term fund-level financing for investments including (a) for investments that have a longer lead time to generate cash flow or to acquire assets, (b) for platform investments that require capital to fund operating expenses prior to developing sufficient scale to self-fund or generate enterprise value, (c) for investments where cash is retained in the business to fund activity that results in incremental returns for the investment, (d) to make margin payments as necessary under currency hedging arrangements, (e) to fund management fees otherwise payable by investors, (f) for investments with revenues in a foreign currency and (g) when Adams Street otherwise determines that it is in the best interests of the applicable fund.

Key Risk Factors (continued)

Adams Street

Availability of High-Quality Investment Opportunities: Investors will be dependent on the ability of Adams Street and its affiliates to provide access to high-quality private markets investment opportunities. There is no assurance that such opportunities will be available during the period over which an investor's investment will be allocated to investments or that high-quality investment opportunities will be available at attractive prices. In addition, in the event Adams Street does identify any such opportunities, it should not be assumed that an Adams Street-managed investment vehicle will be allocated a portion of any such opportunity. The application of the factors described herein, and applied under Adams Street's investment allocation policy (the "Investment Allocation Policy"), will result in the exclusion of certain managed entities from an allocation, and the Investment Allocation Policy does not require that a managed entity, including any particular investment vehicle, participate in every entity in which it is eligible to invest.

Competition: Investment vehicles managed by Adams Street will compete for investments with third parties, including other financial managers, investment funds, pension funds, corporations, endowments and foundations, wealthy individuals and family offices, among many others. Investment vehicles, including those managed by Adams Street will compete for limited capacity in such investments. There can be no assurance that Adams Street will be able to locate and complete attractive investments or that the investments which are ultimately made will satisfy all of the relevant objectives.

Compliance with the Directive: The European Alternative Investment Fund Managers Directive (2011/61/EU) (the "EU Directive") came into force in the European Economic Area (the "EEA") in July 2011 and was on-shored by the United Kingdom ("UK") following Brexit (the EU Directive and its UK equivalent together, the "Directive"). The Directive applies to (i) alternative investment fund managers (each, an "AIFM") established in the EEA and/or the UK (as applicable) who manage EEA, UK or non-EEA alternative investment funds (each, an "AIF"), (ii) non-EEA and/or non-UK AIFMs who manage EEA and/or UK AIFs (as applicable), and (iii) non-EEA and/or non-UK AIFMs who market their AIFs within the EEA and/or the UK (as applicable). The Directive imposes various operating requirements on EEA and UK AIFMs, and, to a lesser extent, non-EEA and/or non-UK AIFMs seeking to market an AIF within the EEA and/or the UK.

As a result of the Directive's implementation, Adams Street or its agents may be required to give notice to or seek the approval of regulators in certain countries in connection with the marketing of certain investment vehicles. This may preclude Adams Street from marketing to you further until such notice is given or approval is obtained, or otherwise significantly disrupt marketing activity. Compliance by Adams Street or its agents with the transparency, reporting and disclosure requirements of the Directive will significantly increase the regulatory burden and costs of doing business within the EEA and/or the UK and this may have an adverse impact on certain investment vehicles and Adams Street.

The operating requirements imposed by the Directive include, among other things, rules relating to the remuneration of certain personnel, minimum regulatory capital requirements, restrictions on use of leverage, restrictions on early distributions ("asset stripping" rules), disclosure and reporting requirements to both investors and home state regulators, and independent valuation of an AIF's assets. As a result, the Directive could have an adverse effect on Adams Street and certain of its investment vehicles by, among other things, imposing extensive disclosure obligations significantly restricting marketing activities within the EEA and the UK, increasing the regulatory burden and costs of doing business in the UK and in EEA member states, and potentially requiring Adams Street to change its compensation structures for key personnel, thereby affecting Adams Street's ability to recruit and retain these personnel. The Directive could also limit Adams Street's operating flexibility and a fund's investment opportunities, as well as expose Adams Street and/or a fund to conflicting regulatory requirements in the United States (and elsewhere) and the EEA or the UK.

On 26 March 2024, the final text amending the EU Directive ("AIFMD II") was published in the Official Journal of the European Union, with an adoption date of 15 April 2024 (the "Adoption Date"). While the changes introduced by AIFMD II will predominantly come into force two years from the Adoption Date, there are amendments which when implemented and applied, could increase the costs associated with the management and operation of certain Adams Street's investment vehicles, including but not limited to: concentration limits, delegation, limits on lending to connected entities, risk retention requirements, mandated liquidity management mechanisms and disclosure and reporting requirements, to the extent applicable to the relevant investment vehicle.

Extracted Performance Methodology

Because of the difficulty of applying fund-level fees to individual investments, the fee schedule used to develop extracted net performance figures is based on the application of a gross-net fund-level percentage differential to investment(s). Extracted performance represents performance of a single investment or group of investments made within a single fund, and if grouped together have been grouped together because they represent investments made within a similar strategy, in similar industries, across similar year of initial investment, with similar liquidity dates, within similar geographies or for other reasons as described by the composite.

The calculation of net performance for all extracts uses the largest percentage fee paid (measured as the differential between net and gross fund-level returns, based on both IRR and multiple (whether MOIC, TVPI, or DPI), respectively, by an investor in the relevant fund, with the relative percentage difference then applied at the investment-level. For example, the calculation with respect to IRR and multiple would work as follows:

- If the investor that experienced the largest spread between their gross and net fund-level IRR returns experienced 20% gross IRR and 18% net IRR returns, this would be calculated as a 10% reduction in the net performance (i.e., 20-18=2 and 2/20 =10%). Therefore, applying this at the individual investment level, an investment that experienced 15% gross IRR return would be estimated to have 13.5% net IRR return.
  - In instances where investment-level gross IRR is negative, the extracted net IRR estimate is calculated by treating the return as an absolute value to calculate the gross/net spread; for example, if the investor that experienced the largest spread between their gross and net fund-level IRR returns experienced 20% gross IRR and 18% net IRR returns, this would be calculated as a 10% reduction in the net performance (i.e., 20-18=2 and 2/20 =10%). Therefore, applying this at the individual investment level, an investment that experienced -10% gross IRR return would be estimated to have -11% net IRR return.
  - For investments that fully realize in less than one year, the extracted net IRR estimate is calculated by treating the return as a time-weighted return, which uses the extracted net multiple as a basis. In these instances, the extracted net multiple is adjusted to reflect the respective holding period (i.e., deal A realized in 6 months and has a 1.10x gross MOIC and 21% gross annualized IRR. If the respective Adams Street fund has a life of two years and the investor that experienced the largest spread between their gross and net fund-level MOIC returns experienced 3.0x MOIC and 2.7x net MOIC returns, deal A would be estimated to have an extracted net multiple of 1.07). Therefore, deal A has an estimated annualized extracted net IRR of 15%.
  - In instances where investment-level gross multiple is greater than or equal to 1.0x, but the extracted net multiple is less than 1.0x, the IRR estimate is calculated by treating the return as a time-weighted return and uses the extracted net multiple as a basis. The extracted net multiple is based on the investor that experienced the largest spread between their gross and net fund-level MOIC returns, as further described below.
- Extracted performance showing an estimated net IRR is not considered meaningful for funds where investor cash flows are less than one year and therefore are not shown. Additionally, neither gross nor estimated net IRR are shown for unrealized deals less than one year.
- If the investor that experienced the largest spread between their gross and net fund-level MOIC returns experienced 3.0x MOIC and 2.7x net MOIC returns, this would be calculated as a 10% reduction in the net performance (i.e., 3.0-2.7=0.3 and 0.3/3.0 =10%). Therefore, applying this at the individual investment level, an investment that experienced 2.5x gross MOIC return would be estimated to have 2.25x net MOIC return.
- In certain situations, extracted performance may be presented from a composite (i.e., geographic or deal status extracts from a strategy composite). In such situations, extracted net performance is calculated based on the composite's gross / net spread.

The above calculation methodology results in a hypothetical unlevered net return as: (i) the calculation methodology is based on unlevered fund-level returns and therefore automatically incorporates actual management fees, carried interest, organizational and operating expenses paid by applicable investors; however, this may result in a larger or smaller application of fees to certain investments than would be the case within the context of the fund where such fees are spread out and therefore generally dollar-weighted; and (ii) the effects of lines of credit are not included in the calculation of extracted net performance as gross investment-level returns are not affected by lines of credit.

The returns of Adams Street investment vehicles generally incorporate the use of leverage as a result of the use of a line of credit; provided that for individual investors and unlevered fund-level returns, where returns are dependent on the date capital is actually called and distributed, lines of credit have the ability to substantially alter, either positively or negatively, reported performance. Certain Adams Street strategies and/or investment vehicles, commonly including private credit-focused vehicles, make use of asset-based loans in addition to subscription lines of credit and as a result, the effect of leverage on the actual returns experienced at both the investor and fund-level for private credit strategies are generally magnified because of the effect of such leverage.

Methodology and Assumptions Associated with Calculation of Composites and Extracts (continued)

As of January 2026

Adams Street

The exact types and amount of fees, expense caps, cash flows, percentages and other deductions of the most applicable fund are generally available in the term sheet for the most recent applicable fund (or prospective fund, although fees for such prospective fund are subject to change prior to finalization). Additionally, fees, including a detailed description of Adams Streets assumptions and process is available upon request.

Actual fees for earlier funds may have been higher, lower, contained different ramp up or tail down provisions, have different hurdles or carried interest percentages, as well as other provisions; therefore, the estimated net performance does not represent the returns achieved by any Adams Street investor or Adams Street fund. There can be no guarantee as to the fee schedule for future funds and any fees will be disclosed in, and are qualified in their entirety by reference to, the final governing and offering documents for such fund.

Calculated fees are based on the highest fees paid by US-based investors; foreign investors entering a fund through an offshore vehicle would generally be expected to bear tax obligations associated with their commitment to the offshore vehicle. Tax obligations are not estimated, as they are generally dependent on the performance of the fund as well as an investor's individual circumstances. Additional information can be found in the applicable offering documents.

The calculation methodology and related assumptions are updated on a periodic basis and were last updated as of May 2023. Data is through June 30, 2025, unless indicated otherwise.

Composite Performance Methodology

The modeled fee schedule used to develop composite net performance figures is based on either (i) the most applicable fund currently in market (or, in the case of an initial fund, the proposed fee schedule), or (ii) if no fund is in market, the most recently closed fund. The fee schedule used for calculation may be customized for potential separately managed account and fund of one investors, which in each case may be lower than would exist in a commingled fund and therefore such hypothetical performance would be expected to be higher. Composite performance represents investments across multiple funds that have been grouped together because they represent investments made within a similar strategy, in similar industries, across similar year of initial investment, with similar liquidity dates, within similar geographies or for other reasons as described by the composite.

The model net performance for all composites assumes a management fee schedule that represents the average management fee paid by the highest fee-paying investor as computed over the anticipated life of the fund. This methodology results in slightly higher fees being paid at the beginning and end of the life of the fund, while also showing lower fees during the middle years of the fund, in each case than are actually incurred. In certain instances, funds may have tail down but not ramp up periods.

Modeled carried interest is similarly based on the highest carried interest by offering without regard to hurdle. This results in carried interest being applied without regard to whether carry is accrued or paid. This is applicable to Adams Street's offerings that charge carried interest. Not all Adams Street offerings charge carried interest.

Funds generally incur both operational and organizational expenses. Organizational expenses typically are incurred in the first year of the life of the fund and are subject to an expense cap. Operational expenses are incurred on an annual basis, recur throughout the life of the fund and generally represent a range of 5-7 basis points of an investor's total capital commitment.

The above calculation methodology results in a hypothetical unlevered net return as the effects of lines of credit are not included in the model as gross investment-level returns are not affected by lines of credit. The returns of Adams Street investment vehicles generally incorporate the use of leverage as a result of the use of a line of credit; provided that for individual investors and unlevered fund-level returns, where returns are dependent on the date capital is actually called and distributed, lines of credit have the ability to substantially alter, either positively or negatively, reported performance. Certain Adams Street strategies and/or investment vehicles, commonly including private credit-focused vehicles, make use of asset-based loans in addition to subscription lines of credit and as a result, the effect of leverage on the actual returns experienced at both the investor and fund-level for private credit strategies are generally magnified because of the effect of such leverage.

The exact types and amount of fees, expense caps, cash flows, percentages and other deductions of the most applicable fund are generally available in the term sheet for the most recent applicable fund (or prospective fund, although fees for such prospective fund are subject to change prior to finalization). Additionally, fees, including a detailed description of Adams Street's assumptions and modeling process are available upon request.

Actual fees for earlier funds may have been higher, lower, contained different ramp up or tail down provisions, have different hurdles or carried interest percentages, as well as other provisions; therefore, the modeled net performance does not represent the returns achieved by any Adams Street investor or Adams Street fund. There can be no guarantee as to the fee schedule for future funds and any fees will be disclosed in, and are qualified in their entirety by reference to, the final governing and offering documents for such fund.

Methodology and Assumptions Associated with Calculation of Composites and Extracts (continued)

As of January 2026

Adams Street

Model fees are based on the highest fees paid by US-based investors; foreign investors entering a fund through an offshore vehicle would generally be expected to bear tax obligations associated with their commitment to the offshore vehicle. Tax obligations are not estimated, as they are generally dependent on the performance of the fund as well as an investor's individual circumstances. Additional information can be found in the applicable offering documents.

The calculation methodology and related assumptions are updated on a periodic basis and were last updated as of May 2023. Data is through June 30, 2025, unless indicated otherwise.

The above is considered to represent a relatively detailed description of Adams Street's methodology; however, additional details are available upon request.

Risks and Other Material Assumptions Associated with Use of Models, Estimates and Hypothetical Performance

This document contains projections, forward-looking statements, and analysis of past performance, which in some cases may be hypothetical (as further described herein), and includes all statements regarding the expected financial position, business and financing plans or any projections, forecasts, targeted or illustrative returns or related statements or expressions of opinion. Such forward-looking statements or hypothetical analysis of past performance are, as applicable, only estimates of future results or past performance and are based upon assumptions made at the time such projections or statements were developed or made. Although Adams Street believes that such statements are reasonable, it can give no assurance that such expectations will prove to have been correct and such statements should not be regarded by the recipient as a guarantee, prediction or definitive statement of fact or probability. There can be no assurance that the results set forth in the projections or the events predicted will be attained, and actual results may be significantly different from the projections. Also, general economic factors, which are not predictable, can have a material impact on the reliability of projections or forward-looking statements. Further, important factors that could cause actual results to differ materially are disclosed, either within this presentation, are available in the associated offering document of the applicable or are available upon request. All subsequent written and oral forward-looking or hypothetical statements attributable to an Adams Street offering or persons acting on Adams Street's or the Fund's behalf are expressly qualified in their entirety by such disclosures and limitations.

Adams Street has a reasonable basis to believe that such projections, statements and hypothetical performance are relevant to the likely financial situation and investment objectives of the intended audience based on a variety of factors, including, but not limited to, in each case as determined applicable: (i) Adams Street's experience managing prior investment vehicles and the fact that in the past similarly situated investors have valued (and in some cases, requested) similar types of hypothetical performance; (ii) whether the recipient is an existing investor in an Adams Street product; (iii) the net worth or investing experience of the recipient; (iv) whether the recipient meets certain regulatory categories (e.g., qualified purchasers, qualified clients, or qualified institutional buyers); or (v) whether the recipient is a natural person or sophisticated institution.

Adams Street Partners Net Performance

As of June 30, 2025

Fund Name	Performance in USD Gross IRR	Net IRR	PME*	Net Multiple	PME Benchmark

Notes to Performance: Adams Street Partners Net Performance

As of June 30, 2025

Note: Brinson Partnership Subscription gross and net IRR presents representative subscription performance of a subscriber that followed Adams Street Partners' recommended allocation and pays the highest fees. For Adams Street Funds, actual commingled fund performance gross and net IRR are presented. Gross IRRs are calculated using cash flows between the Adams Street Partners vehicle and investors in the fund and are net of management fees, carried interest and expenses charged to the underlying private equity funds, in the case of primary and secondary funds, but gross of Adams Street Partners' management fees, carried interest and expenses, which reduce returns to investors. Net to LP IRRs are net of Adams Street Partners' management fees, carried interest and expenses as well as net of management fees, carried interest and expenses charged to the underlying private equity funds. Any fund-level IRRs and multiples presented herein for the 2015 Global Program Funds and all subsequently formed commingled Funds reflect the use of the Fund's capital call credit line (or, in the case of an Adams Street Global Fund, capital call credit lines of the underlying Funds) and are calculated using limited partner capital call dates, rather than the earlier dates on which the investment was made using the line of credit. The use of such dates generally results in higher IRR and multiple calculations, and the related differences in IRR and multiple figures could be material. The group of investments shown on these slides invests in primary investments, secondary investments, growth equity investments, co-investments, and private credit investments. Includes all Adams Street Partners commingled funds excluding custom account mandates. Capital-weighted annualized returns from inception through quarter end. There can be no guarantee that unrealized investments will ultimately be liquidated at the values reflected in this return data. Each Brinson Partnership Subscription includes fund allocations made within a series of pooled investment vehicles. Performance for private equity funds with vintage years later than 2022 (or later than 2023, where applicable, for private credit funds because of the difference in timing of cash flows and investment strategy) is not shown because performance early in a fund's life is not generally meaningful due to fee drag and immature investments. Past performance is not a guarantee of future results.

*Public Market Equivalent (PME) is calculated using the S&P 500 Index for Brinson Partnership Subscription, US Funds and Direct Funds; MSCI All Country World for Global Funds; MSCI EAFE (Europe, Australasia, Far East) for Non-US and Non-US Developed Funds; MSCI Emerging for Emerging Markets Funds; S&P LSTA for Private Credit Funds; NASDAQ for Venture Innovation Funds; and MSCI Europe for European Venture Funds. The PME calculation is based on the Net IRR cash flows which reflects the payments of fees, carried interest and expenses.

^ During some periods, PME could not be calculated because the tracking position in the underlying benchmark index would have resulted in a short position. In these cases, the PME is calculated using the "Direct Alpha" PME methodology (Gredil, Griffiths, Stucke, "Benchmarking Private Equity: The Direct Alpha Method," 2014). Mathematically, Direct Alpha PME is equal to the IRR of the future value of the cash flows underlying the IRR calculation, where future value is based on the return of the benchmark index, less the IRR of the actual value of the cash flows.

**Private Credit II contains an additional sleeve (Fund II-C) which operates as a dedicated vehicle for a single European investor with a custom mandate, the performance of which is not included herein as it operates similar to a separately managed account and has additional features, such as a commodity hedge, some of which are required for regulatory purposes and add additional expense.

Investment Advisors Act Rule -206(4)-1 Disclosure

Adams Street

Greenstone Placement Management FZ-LLC ("**Greenstone**") and, indirectly, each sub-agent engaged by Greenstone, receives cash compensation from Adams Street Partners, LLC ("**Adams Street**") for referring investors to one or more Adams Street -sponsored funds (the "**Funds**"). The cash compensation that Greenstone will receive from Adams Street is a percentage of the amount invested into a Fund by the investor that it refers, or an affiliate thereof, with such percentage generally varying between 1% to 2% and depending on certain factors, such as whether the investor has previously committed to a Fund. Greenstone additionally receives a monthly retainer of $25,000 from Adams Street and has the material out-of-pocket expenses it incurs in referring investors to the Funds pre-paid or reimbursed by Adams Street. In certain situations, Greenstone may also receive compensation for additional or future capital commitments made by an investor even though Greenstone is not directly involved in solicitation activities for such investment and the amount of fees received in relation to such investments will similarly be based on a percentage of assets committed. Such compensation from time to time will be greater than that of other products that Greenstone might offer on behalf of Adams Street or other third-party fund sponsors. The solicitation of the recipient of this document by Greenstone or its sub-agent to invest in the Funds represents a paid endorsement. Accordingly, Greenstone and its sub-agents have an incentive to promote the Funds that results in a material conflict of interest. Greenstone and its sub agents are not a client of Adams Street; Greenstone and Adams Street are not associated with one another and have no formal relationship outside of the foregoing arrangement.

Any cash compensation paid to Greenstone or, indirectly, its sub-agents by Adams Street is ultimately borne by Adams Street and is not passed on or otherwise charged to an investor, nor does such compensation increase the fees or expenses paid by or charged to an investor, except where such amounts are subsequently reimbursed by Adams Street, including through a management fee offset.

Additional Disclaimer

Adams Street

The information provided is strictly private and confidential and is being provided to a limited number of investors. It must not be provided to any person other than the original recipient, and may not be reproduced, disseminated, distributed or used for any other purpose.
The information provided is a summary and is not an offering or a solicitation of an offer. Any such offer or solicitation to subscribe or purchase limited partnership interests in ASP (Feeder) Global Secondary Fund 8 L.P, an exempted limited partnership formed in the Cayman Islands (the "Fund") shall only be made to qualified investors by means of a confidential private offering memorandum, as may be amended or supplemented from time to time, (the "Memorandum") and related offering materials, and only in those jurisdictions where permitted by law. Such offer or solicitation may only be made by means of delivery of the Memorandum, which contains important information (including investment objective, policies, risk factors, fees, tax implications, and accredited investor qualifications) relating to the relevant investment opportunity. Investors should not make an investment unless they are prepared to lose all or a substantial portion of their investment.
Subscriptions to the Fund are made in United States Dollars ("USD"). As of December 22, 2025, the Fund has raised $122,251,000 USD.
The fees and expenses charged in connection with this investment include performance fees, may be higher than the fees and expenses of other investment alternatives and may offset profits. There is no guarantee that the investment objective will be achieved. Moreover, the past performance of the investment should not be construed as an indicator or evidence of future performance. No deductions for charges and expenses are made at the time of initial investment; voluntary redemptions in the Fund are not permitted, however, investors are responsible for fees and expenses if an investor transfers their interests in the Fund, which transfer must be approved by the relevant Fund's general partner, and such fees and expenses may be deducted from the investor's capital account.
This document is intended for discussion purposes only and does not create any legally binding obligations on the part of Greenstone Placement Management FZ-LLC or any of its affiliates (collectively, "Greenstone"), Adams Street Partners, LLC (the "Company") or the Fund. Without limitation, this document does not constitute an offer, an invitation to offer, or a recommendation to enter into any proposed transaction involving Greenstone, the Company, or the Fund.
When making an investment decision, you should rely solely on the Memorandum and final documentation relating to the transaction and not the summary contained herein. Investors should refer to the Memorandum for full details in relation to the Fund, including (but not limited to) the mechanism of profits distribution and redemption, any prohibitions or restrictions on the investor, its trading or subscriptions, and investment risks. Additional details and disclaimers, such as those related to presentation of performance, including the methods of calculation, use of leverage and other important information provide necessary context and can be found in the Memorandum and/or any marketing materials which have been distributed in connection with the summary information. The transaction or product(s) mentioned herein may not be suitable for all individuals and/or investors. Before entering into any transaction, you should take steps to ensure that you fully understand such transaction and obtain an independent professional assessment as to the suitability of such transaction in light of your own objectives and circumstances, including the possible risks and benefits of entering into such transaction.
The Fund is not listed on a stock exchange. The investment described in this document is speculative, involves a high degree of risk and is illiquid. It may be difficult to sell or realize the investment, and to obtain reliable information about its value or the extent of the risks to which it is exposed. The Fund is a geared fund and may be subject to sudden and large decreases in value which could cause substantial losses equal to the amount originally invested.
If you decide to enter into any transaction with either the Company or the Fund, you do so in reliance on your own judgment. You should not construe the contents of this document as providing financial, legal, Shari'a, tax, investment, or any other advice.
By accepting this document, you acknowledge that Greenstone is not acting as your broker, financial advisor, in any other fiduciary capacity, or otherwise as your advisor or agent with respect to the transaction. The information contained in this document is based on material received from the Company and/or the Fund. Assumptions, estimates, and opinions contained in this document constitute information Greenstone received from the Company and/or the Fund as of the date of the document and may be subject to change without notice. Neither Greenstone, the Company, the Fund, nor any of their respective officers, directors, employees, agents, controlling persons, shareholders, and affiliates, makes any representation or warranty, expressed or implied, as to the accuracy or completeness of the information contained in this document, and nothing contained herein is, or shall be relied upon as, a promise or representation, whether as to past or future facts or results.
The market analysis, projections, targeted returns, estimates, and similar information, including all statements of opinion and/or belief contained in this document (collectively, "forward-looking information"), are subject to inherent uncertainties, contingencies, and qualifications and are based on a number of assumptions. Forward-looking information involves significant elements of subjective judgment and analysis that may or may not be correct. You are cautioned that forward-looking information is not a guarantee of future performance or results and involves risks and uncertainties that cannot be predicted or quantified; consequently, the actual performance of the Fund or any entity involved in a transaction may differ materially from that expressed or implied by such forward-looking information. In all cases where historical performance is presented, please note that past performance is not a reliable indicator of future results and should not be relied upon as the basis for making an investment decision. You are cautioned that currency rate fluctuations can adversely affect the investment. In particular, where a transaction or product is denominated in a foreign currency, changes in foreign exchange rates may adversely affect the value, price, or income of the investment.
The information herein is proprietary and confidential, is intended for use by the recipient only, and may not be provided to any third party other than the recipient's legal, Shari'a, tax, financial and/or accounting advisors for the purpose of evaluating such information. By accepting this document, you agree that you will cause your directors, officers, employees, agents, and representatives to use this document and such information only to evaluate an investment and for no other purpose, and that you and they will not divulge any such information to any other party. This document may contain material non-public information. Prior to entering into any transaction, you should determine, without reliance upon Greenstone, the Company, or the Fund, the economic risks and merits, as well as the financial, legal, Shari'a, tax, and accounting characterizations and consequences of the transaction, and independently determine that you are able to assume these risks. In this regard, by accepting of this document, you acknowledge that: (a) you have been advised that Greenstone, the Company, and the Fund are not in the business of providing financial, legal, Shari'a, tax, or accounting advice; (b) you understand that there may be financial, legal, Shari'a, tax, or accounting risks associated with a transaction; (c) you should receive financial, legal, Shari'a, tax, and accounting advice from advisors with appropriate expertise to assess relevant risks; and (d) you should apprise senior management in your organization as to the financial, legal, Shari'a, tax, and accounting advice (and, if applicable, risks) associated with a transaction and Greenstone's, the Company's and the Fund's disclaimers as to these matters.

Additional Disclaimer

For residents of the United Arab Emirates (the "UAE"):

In addition to the foregoing, the following is applicable to investors located in the UAE:

This investment opportunity does not constitute, and is not intended to constitute, a public offer in the UAE and accordingly should not be construed as such. This investment opportunity is not for general circulation to the public in the UAE nor will the opportunity be presented to the public in the UAE. The document is for the use of the recipient only and should not be given or shown to any other person (other than employees, agents, or consultants in connection with the addressee's consideration thereof).

The investment opportunity is only being offered to a limited number of Professional Investors as defined by UAE Securities & Commodities Authority (the "SCA") in the SCA Chairman of the Authority's Board of Directors' Decision No. 13 of 2021 on the Regulations Manual of the Financial Activities and Status Regularization Mechanisms. Any approval of the SCA of the offering, sale, promotion, or advertisement in the UAE does not represent a recommendation to purchase or invest in the Fund. The SCA has not verified the content of this document and may not be held liable for the accuracy or completeness of the document. The investment opportunity to which this document relates may be illiquid or subject to restrictions on resale. Nothing contained in this document is intended to constitute UAE investment, legal, tax, accounting, or other professional advice. This document is for the information of prospective investors only and nothing in this document is intended to endorse or recommend a particular course of action. Prospective investors should conduct their own due diligence on the Fund. If you do not understand the contents of this document, you should consult an authorised financial advisor.

Prospective investors have the right to review financial reports in relation to the Fund. The minimum limit for subscription or purchase of limited partnership interests to the Fund is $10,000,000 USD, except as otherwise agreed to by the Company in its sole discretion. Under no circumstances will subscriptions or purchases to the Fund in the UAE less than an equivalent of AED 1,000,000 be accepted.

Promotion of financial products and foreign securities are either distributed or approved by Greenstone Equity Partners Financial Products Promotion LLC, 120th floor, Burj Khalifa, Downtown Dubai, Dubai, United Arab Emirates, authorized and regulated by the SCA under Category Five (Arranging and Advising) with License Number 703050. For any queries or further information regarding financial reports or the subscription, sale, and purchase of interests in the Fund, please contact uaepromotion@gsequity.com.

For residents of the State of Kuwait ("Kuwait"):

In addition to the foregoing, the following is applicable to investors located in Kuwait:

The investment opportunity has not been licensed for offering in Kuwait by the Kuwait Capital Markets Authority or any other relevant Kuwaiti government agency. The offering of the investment opportunity in Kuwait on the basis of a private placement or public offering is, therefore, restricted in accordance with Law No. 7 of 2010 concerning Establishing Capital Markets Authority and Organising Securities Activities and its Executive Bylaws (as amended).

No private or public offering of the investment opportunity is being made in Kuwait. No marketing, solicitation or inducement activities are being used to offer or market the investment opportunity in Kuwait; no services relating to an offering, including the receipt of applications, will be rendered within Kuwait; and the investment opportunity will not be sold or otherwise concluded in Kuwait.

The investment opportunity is only available outside Kuwait. Prior to investing, a prospective investor should consult a financial advisor who has been duly licensed by the Kuwait Capital Markets Authority and with his, her or its own legal, business and tax advisors to determine the appropriateness and consequences of an investment for such prospective investor and arrive at an independent assessment of such investment.

This investment opportunity is not for general circulation to the public in Kuwait.

For residents of the Kingdom of Saudi Arabia (the "Kingdom"):

In addition to the foregoing, the following is applicable to investors located in the Kingdom:

This document may not be distributed in the Kingdom except to such persons as are permitted under the Investment Funds Regulations issued by the Capital Market Authority. The Capital Market Authority does not make any representation as to the accuracy or completeness of this document, and expressly disclaims any liability whatsoever for any loss arising from, or incurred in reliance upon, any part of this document. Prospective subscribers of the securities offered hereby should conduct their own due diligence on the accuracy of the information relating to the securities to be offered. If you do not understand the contents of this document, you should consult an authorised financial adviser. Securities advertisements regarding the investment opportunity are either distributed or approved by Greenstone Saudi Arabia (Joint Stock Company), registered at Office 204, 6948 Eastern Ring Branch Rd, Ar Rabwah, Riyadh – 12824, Kingdom of Saudi Arabia and licensed by the Capital Market Authority.

For residents of the Dubai International Financial Centre ("DIFC")

This document relates to a fund which is not subject to any form of regulation or approval by the Dubai Financial Services Authority ("DFSA"). The DFSA has no responsibility for reviewing or verifying this document or any other documents in connection with this investment opportunity. Accordingly, the DFSA has not approved this document or any other associated documents nor taken any steps to verify the information set out in this document and has no responsibility for it. The interests to which this document relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers should conduct their own due diligence on the interests. If you do not understand the contents of this document, you should consult an authorised financial adviser.

:

This document is strictly private and confidential and intended for distribution only to Professional Clients and, therefore, must not be delivered to, or relied on by, any person who does not meet the criteria of a Professional Client. This investment opportunity is for the exclusive use of the persons to whom it is addressed and in connection with the subject matter contained therein.
